SKILLS

React Native

React JS

JavaScript

HTML

CSS

API Integration

Tailwind CSS

Redux Toolkit

PROFESSIONAL PROJECTS

Tasteland App (09/2024 - 12/2024)

- Crafted seamless logic within the Tasteland application to enhance user interactions, directly facilitating smoother operations that resulted in an increase of more than 300 completed orders weekly by engaged sellers.
- Launched a robust application that supports sellers in visiting local shops and villages for order taking, now adopted by over 150 sellers, driving a notable increase in regional sales volume.
- Ensured a seamless user experience by implementing robust offline functionality for order-taking in areas with limited connectivity.

Keune Pakistan (01/2025 - Present)

- Leading the development of the Keune Pakistan app, focused on creating a seamless digital experience for users of Keune's hair care products.
- Overseeing the design and implementation of key features to meet business requirements and provide a user-friendly interface.
- Ensuring the app integrates with backend systems efficiently while maintaining high performance and quality.

Infinity Emlak & Infinity Uactros Apps (08/2024 - 09/2024)

- Developed the entire UI for both Infinity Emlak and Infinity Uactros apps, ensuring a responsive and intuitive design.
- These real estate apps allow users to view their apartments, transaction history, ledger, property details, and due payments.
- Worked closely with the development team to integrate the UI with backend logic, ensuring smooth navigation and user experience.
